IT Audit Manager

CAREER OUTLOOK[2,3]

As we see an increase in the need for innovative technology practices, there will be huge prospects for IT audit managers into the future!

Projected job growth:
15% (2021–2031)

Average salary range:
$93,446/year

IT

Short for "information technology"—the study or use of computer systems for storing, retrieving, and sending information.

Cyberthreat

The possibility of an attempt to damage a computer, a network, or the internet.

Stanley Black & Decker provides tools and innovative solutions for those who fix, fasten, build, and energize our world. **IT audit managers** stay up-to-date on the latest technologies to make sure that the cyber processes taken at every level of the business are safe for the company and the customers.

WHAT IS AN IT AUDIT MANAGER?[1]

IT audit managers play a vital role in assessing and managing the cyber risk of a company's processes. They work to analyze the technical infrastructure of a business and remediate any problems concerning efficiency, cyberthreats, or compliance. At Stanley Black & Decker, they focus on the process and not the person when presenting the results of an audit.

IS IT AUDIT MANAGER A GOOD CAREER FOR ME?

IT Audit Managers are:

- analytical
- solution-seeking
- perseverant
- curious and creative problem solvers
- organized
- excited about computing
- lifelong learners
